

SMART & RESILIENT CITIES DATATHON

The CODATA Connect group invites early career individuals/researchers to develop innovative models and solutions to address the Sustainable Development Goal (SDG) using available open data sources from various government or intergovernmental data platforms. The solution provided should aim at enabling cities to harness full potential of the enormous data being generated around the world, leading to real world solutions, benefiting the cities and the society at large.

The Datathon will be based on Open Data and Open Source software for increasing the potential for decision making for Smart City. The Smart Datathon envisages the following stakeholders for collaboration – Academia, Startups, Government departments, Industry, City administration and Citizens.

**REGISTER
ONLINE**

<https://forms.gle/Uh7G8j6VrhcbVAe69>

1

MAY 30 – JUNE 30

Submit your team's idea including an abstract and any attachments

2

JULY 1 – SEPT 23

Submit your teams finished solution for judgement.

3

OCT 22 – OCT 23

Winners will be announced at the International FAIR Convergence Symposium

**EXAMPLE
PROJECTS**

Machine learning models
Built Algorithms and models
Software tools
Visualizations
Statistical insights/
correlations
Application, apps or
programs

PRICES

500€

For the
winner

300€

For two
runner ups
